CURRICULUM VITAE

Alex Example

Synthetic Research Methods Group | Example Institute for Reproducible Systems
Example City, EX 00000 | alex.example@example.test | https://example.org/people/alex-example

This document is an intentionally fictional test artifact. The person, institutions, appointments, projects, and contact details are invented. Public identifier formats appear solely to exercise ACORN gather behavior.

RESEARCH PROFILE

Research on transparent data systems, metadata quality, and reproducible computational workflows. Current work explores how identifier normalization, document conversion, and provenance signals interact in mixed-format research records.

EDUCATION

Ph.D. in Computational Methods 2018-2023

Example Institute for Reproducible Systems | Example City, EX

- Dissertation: Reliable Discovery of Research Objects in Noisy Documents.
- Built deterministic parsers for identifiers embedded in prose, tables, and hyperlinks.

B.S. in Applied Mathematics 2014-2018

Northbridge College of Examples | Northbridge, EX

- Graduated with honors; capstone studied checksum algorithms and resilient text extraction.

APPOINTMENTS

Research Software Specialist 2025-present

Synthetic Research Methods Group | Example City, EX

- Develops auditable tools for gathering metadata from PDFs, office documents, and plain text.
- Maintains fixture libraries covering punctuation, duplicate records, and malformed identifiers.

Postdoctoral Fixture Fellow 2023-2025

Laboratory for Imaginary Data | Test Harbor, EX

- Designed benchmark documents whose visible text and hyperlink targets expose extraction edge cases.

SELECTED PROJECTS

PID Lantern. A fictional identifier quality dashboard. Project page: https://example.org/projects/pid-lantern

Paper Trail. A synthetic corpus for testing scholarly document conversion. Repository: https://github.com/example/paper-trail

SELECTED SYNTHETIC PUBLICATIONS

1. A. Example and B. Sample. 2026. Parsing persistent identifiers at document boundaries. *Journal of Synthetic Metadata*, 12(3), 1-19. DOI: 10.1234/alpha.2026.001.

2. A. Example. 2026. Balanced punctuation in scholarly identifiers. *Fixture Studies*, 4(2). https://doi.org/10.1234/beta(2026)7.

3. A. Example and C. Placeholder. 2025. Case-sensitive suffixes in discovery pipelines. DOI: 10.1234/CaseSensitive.XyZ; replicated as doi:10.1234/CaseSensitive.XyZ.

4. A. Example. 2025. Resolver links embedded in parentheses (see https://doi.org/10.1234/gamma.2025.003).

5. A. Example. 2024. ISBN-A patterns as DOI-shaped identifiers. 10.97812345/99990.

SOFTWARE, DATASETS, AND REPORTS

Example Gather Toolkit, version 2.1. Source archive DOI: 10.1234/software_v2.1; documentation repeats the resolver form https://doi.org/10.1234/software_v2.1.

Boundary Corpus. Dataset identifier: 10.1234/data-set_04. The same DOI appears after a label: doi: 10.1234/data-set_04.

Preprint record. arXiv-style URL included as a non-DOI control: https://arxiv.org/abs/2608.01234.

OTHER PERSISTENT IDENTIFIER FORMATS

Synthetic checksum-valid ORCID pattern: https://orcid.org/0000-0000-0000-0001.

Public organization PID example: https://ror.org/01qz5mb56.

ARK syntax example: ark:/99166/w66d60p2 and resolver form https://n2t.net/ark:/99166/w66d60p2.

ISBN syntax examples: ISBN 978-0-306-40627-0 and compact duplicate 9780306406270.

Patent syntax examples: US1234567B2 and spaced duplicate US 1234567 B2.

RAiD-shaped example: https://raid.org/10.99999/example.

PRESENTATIONS

Testing parsers with hostile punctuation 2026

Imaginary Symposium on Metadata Reliability | Example City, EX

- Demonstrated duplicate extraction caused by PDF hyperlink target delimiters.

Checksums are data, too 2025

Synthetic Research Software Forum | Test Harbor, EX

- Compared valid-looking identifiers with checksum failures and truncated forms.

PID EDGE-CASE APPENDIX

This appendix intentionally mixes discoverable identifiers, duplicates, resolver forms, and malformed near-misses. It is part of the fixture, not a claim that any synthetic identifier is registered or resolvable.

Kind	Rendered value	Purpose
DOI	10.1234/alpha.2026.001	Plain text; duplicates linked publication DOI
DOI	https://doi.org/10.1234/alpha.2026.001	Resolver duplicate
DOI	10.1234/beta(2026)7	Balanced parentheses belong to suffix
DOI	(https://doi.org/10.1234/wrapped.004)	Outer prose punctuation
DOI	10.1234/trailing-period.005.	Sentence-ending period
DOI	10.1234/CaseSensitive.XyZ	Case-sensitive suffix
DOI	10.5555/not-a-doi	Handle-like prefix rejected by ACORN DOI validation
DOI	10.12/too-short	Registrant code too short
DOI	11.1234/wrong-directory	Wrong directory indicator
DOI	10.1234/	Missing suffix
ORCID	0000-0000-0000-0001	Synthetic checksum-valid pattern
ORCID	0000-0000-0000-0002	Checksum near-miss
ROR	https://ror.org/01qz5mb56	Resolver form
ROR	https://ror.org/01qz5mb50	Checksum near-miss
ARK	ark:/99166/w66d60p2	Canonical label and shoulder
ARK	ark:99166/W66D60P2	Case variation
ISBN	978-0-306-40627-0	Hyphenated ISBN-13
ISBN	9780306406270	Compact duplicate
Patent	US1234567B2	Compact publication number
Patent	US 1234567 B2	Spaced duplicate
RAiD	https://raid.org/10.99999/example	RAiD resolver form

EXTRACTION BOUNDARY PROBES

A linked DOI whose PDF annotation target may be emitted separately by converters: 10.1234/annotation-target.006.

Comma-separated values: 10.1234/list-a, 10.1234/list-b; 10.1234/list-c.

Adjacent delimiters: [10.1234/brackets] {10.1234/braces} (10.1234/parentheses).

Line break probe: DOI 10.1234/line-break-

continuation-is-not-the-same-token.

Email-like control: pid.fixture@example.test. URL control: https://example.org/10.1234/not-a-path-boundary.
